

**Neotoma and Tilia Workshop**  
**European Pollen Database Meeting**  
**1-2 June 2016**

**What to bring**

Participants are expected to bring their own laptop computer to the workshop. The software listed below will be available for installation at the workshop, but it will save time if participants already have software installed. Tilia is a Windows program, but will run on the Mac under a Windows emulator such as Parallels or VirtualBox. For more information, please see the Tilia home page: <http://www.tiliait.com/>.

**Tilia**

If you do not have the latest version of Tilia, please download from: <http://www.tiliait.com/download/>

If you do not have a licensed version, you can use the following User Name and Product Key. These will be requested the first time you run the program (not during installation).

User Name:  
EPD 2016 Workshop

Product Key  
116A7517020101071A6F5D472E4B502C4568667712771D0570186E42305A402D4233756773660B09777710112D

**R**

If you do not have R installed on your machine, please download and install from:  
<https://www.r-project.org/>

**Bacon**

If you do not have Bacon installed on your computer, please download from:  
<http://chrono.qub.ac.uk/blaauw/bacon.html>

Simply unzip the file and save the WinBacon\_2.2 folder somewhere on your computer.
